

User roles, hierarchy & system flow

LGB Services has **4 active login roles**. Internal users can also have **permission flags** and **IsInternalSignatory** — overlays on Admin / User, not separate roles.

Full document (PDF): [USER ROLES.pdf](#)

Enlarged flowcharts only (PDF): [USER ROLES FLOWCHARTS.pdf](#)

Regenerate PDFs: `python3 docs/build-user-roles-pdf.py` (from repo root)

1. Active roles (4)

#	Role	Side	Scoped to	Typical UI
1	Admin	LGB internal	All customers	Dashboard, customers, packages, admin, workflow config
2	User	LGB internal	Jobs assigned to them	My work tracker, assigned package lines, forms
3	ClientAdmin	Customer external	One CustomerId	Client portal, packages, team & signatories
4	ClientSignatory	Customer external	One company + their name on forms	My documents only

Legacy: Client → migrated to ClientAdmin on startup (not used for new accounts).

2. Role hierarchy

1. Role hierarchy (4 roles + permission overlays)

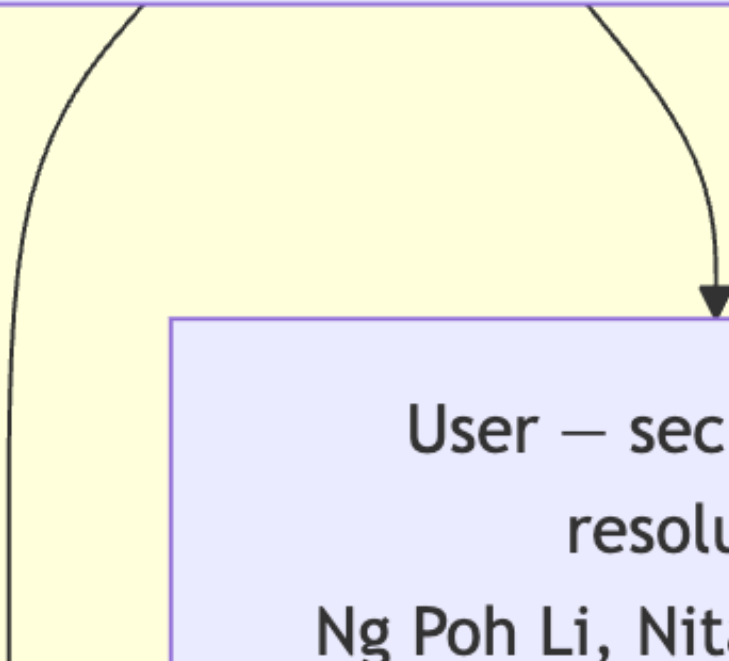

LGB INTERNAL

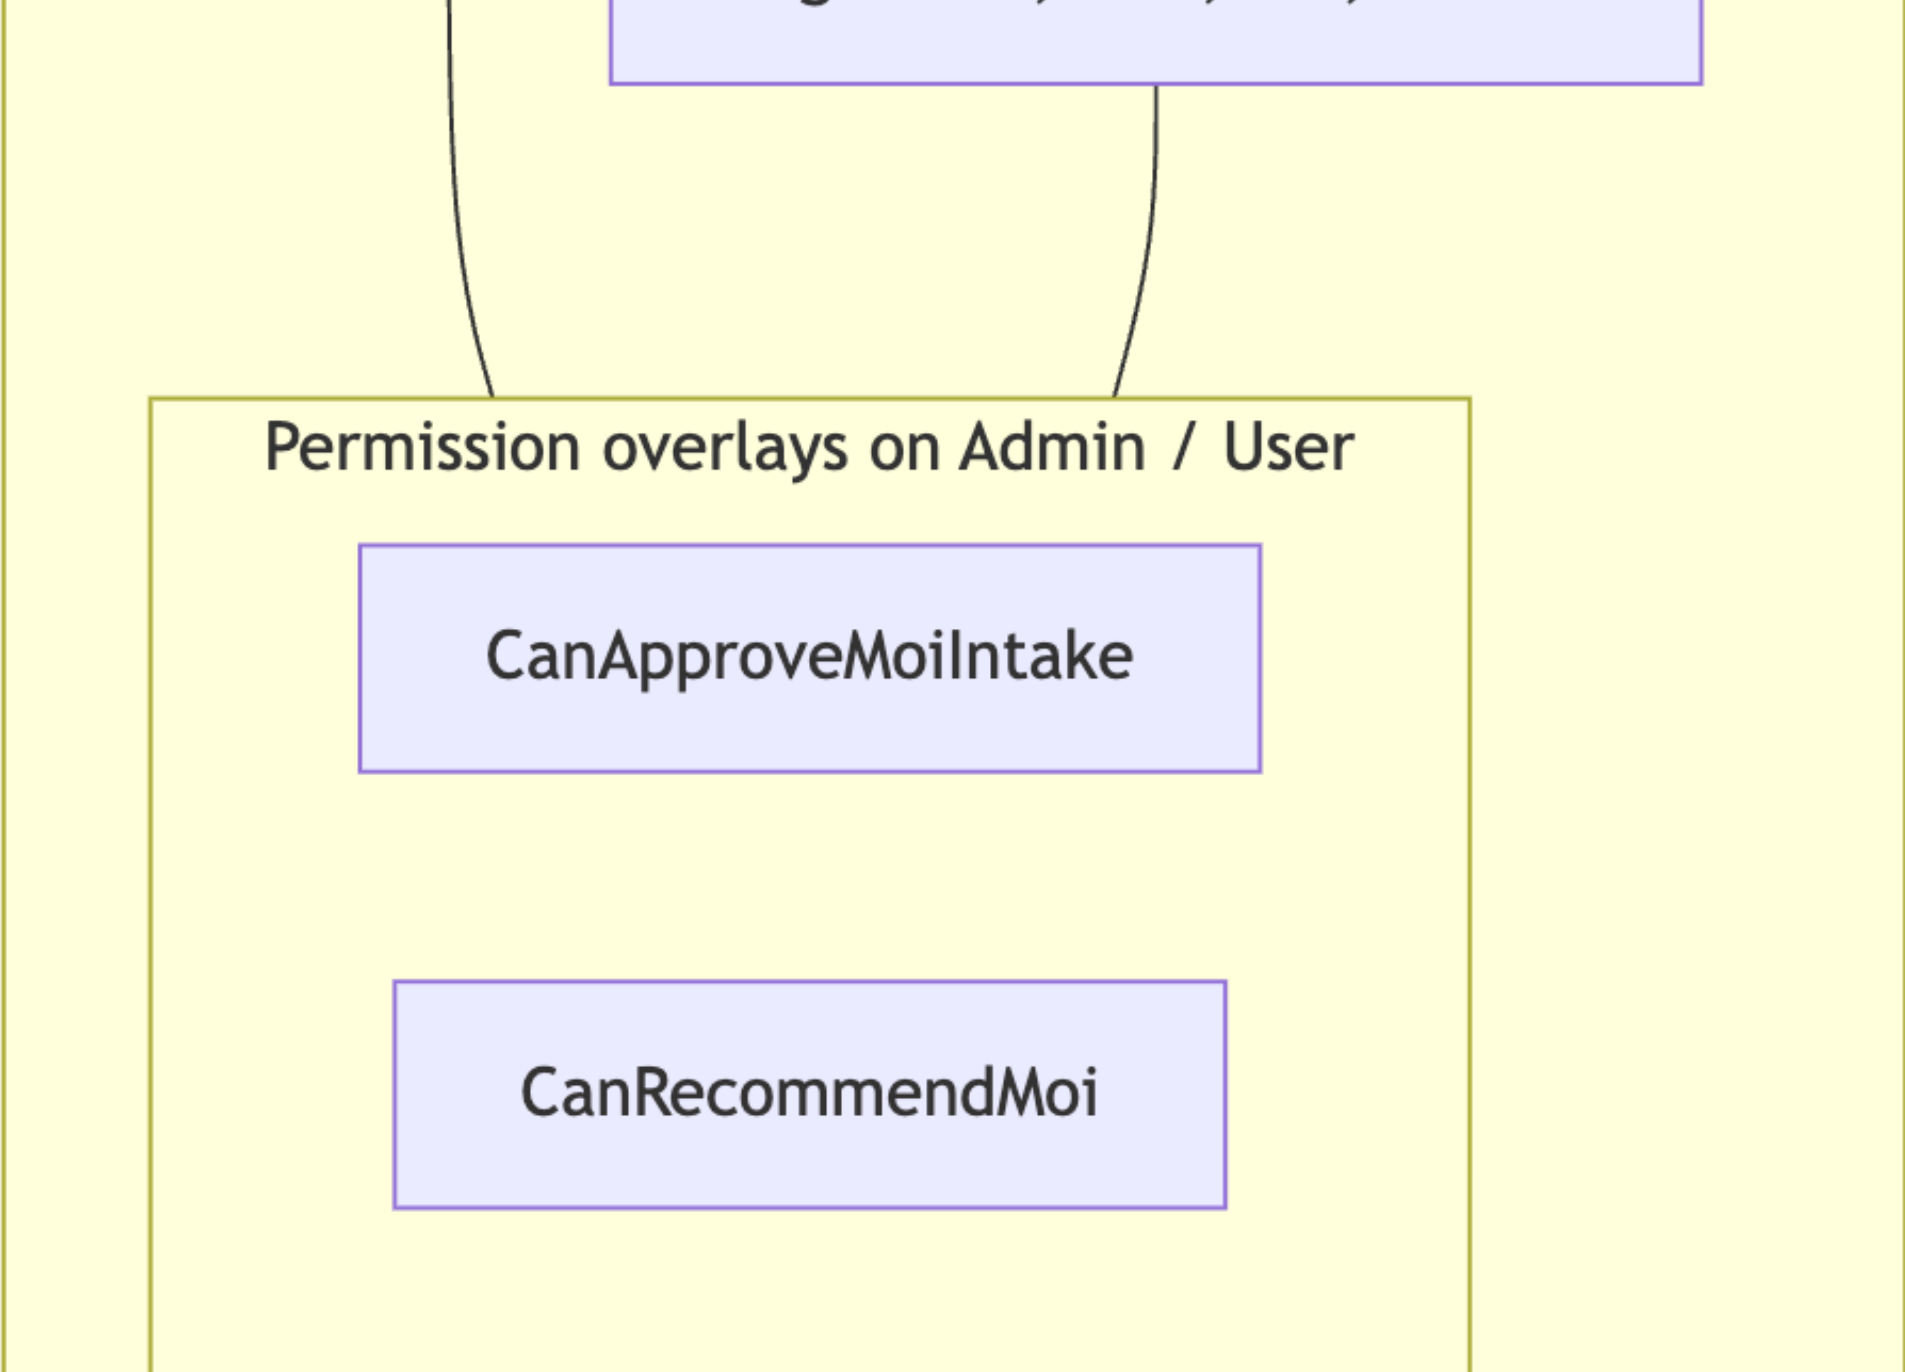

Admin

Sharon – all customers,
packages, users, workflow
config

User – secretarial /
resolution

Ng Poh Li, Nita, Siti, Nadia

Permission overlays on Admin / User

CanApproveMoiIntake

CanRecommendMoi

CanApproveMoi

CanApproveMoa

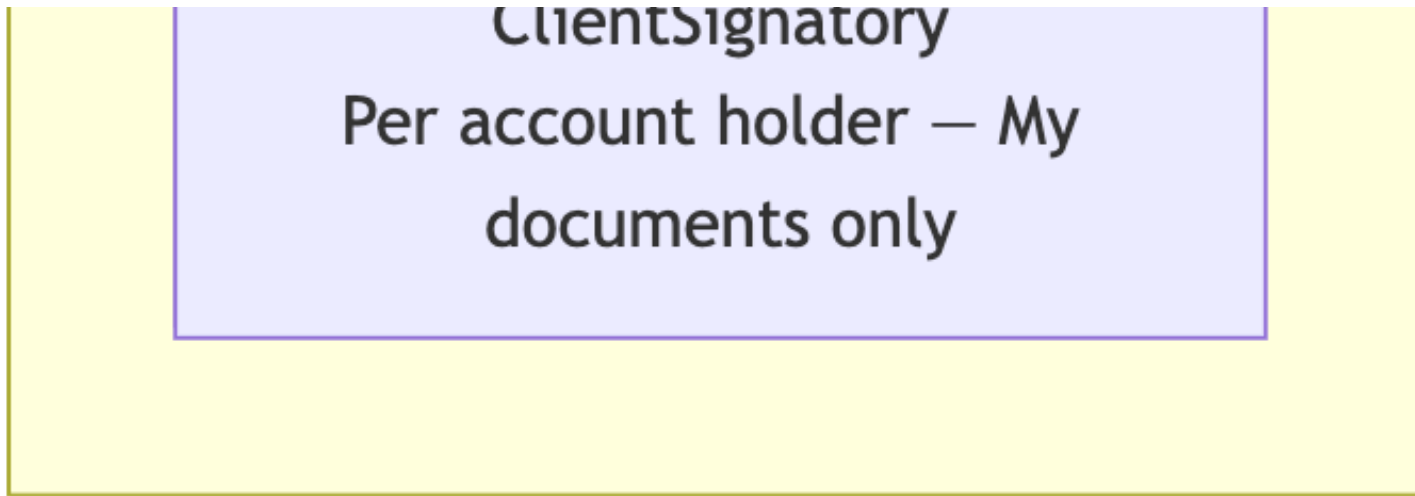

IsInternalSignatory

```
graph TD; A[ ] -.-> B[creates & manages]; B -.-> C[CUSTOMER EXTERNAL — scoped by CustomerId]; C --> D[ClientAdmin<br/>Auto per company —<br/>portal, issue MOI, team]; D --> E[ClientAdmin];
```

creates & manages

CUSTOMER EXTERNAL — scoped by CustomerId

ClientAdmin
Auto per company —
portal, issue MOI, team

Access ladder (high → low)

```
Admin (internal)
├── User (internal secretary)    ← assigned per job; prep MOI/MOA
│   ├── [+ permission flags]    ← intake, recommend, MOI/MOA sign-off
│   └── [+ IsInternalSignatory] ← named MOA workflow step approver
└── customer boundary ─────────

ClientAdmin (external)          ← one company; full client portal
├── ClientSignatory (external)  ← one company; only their forms
```

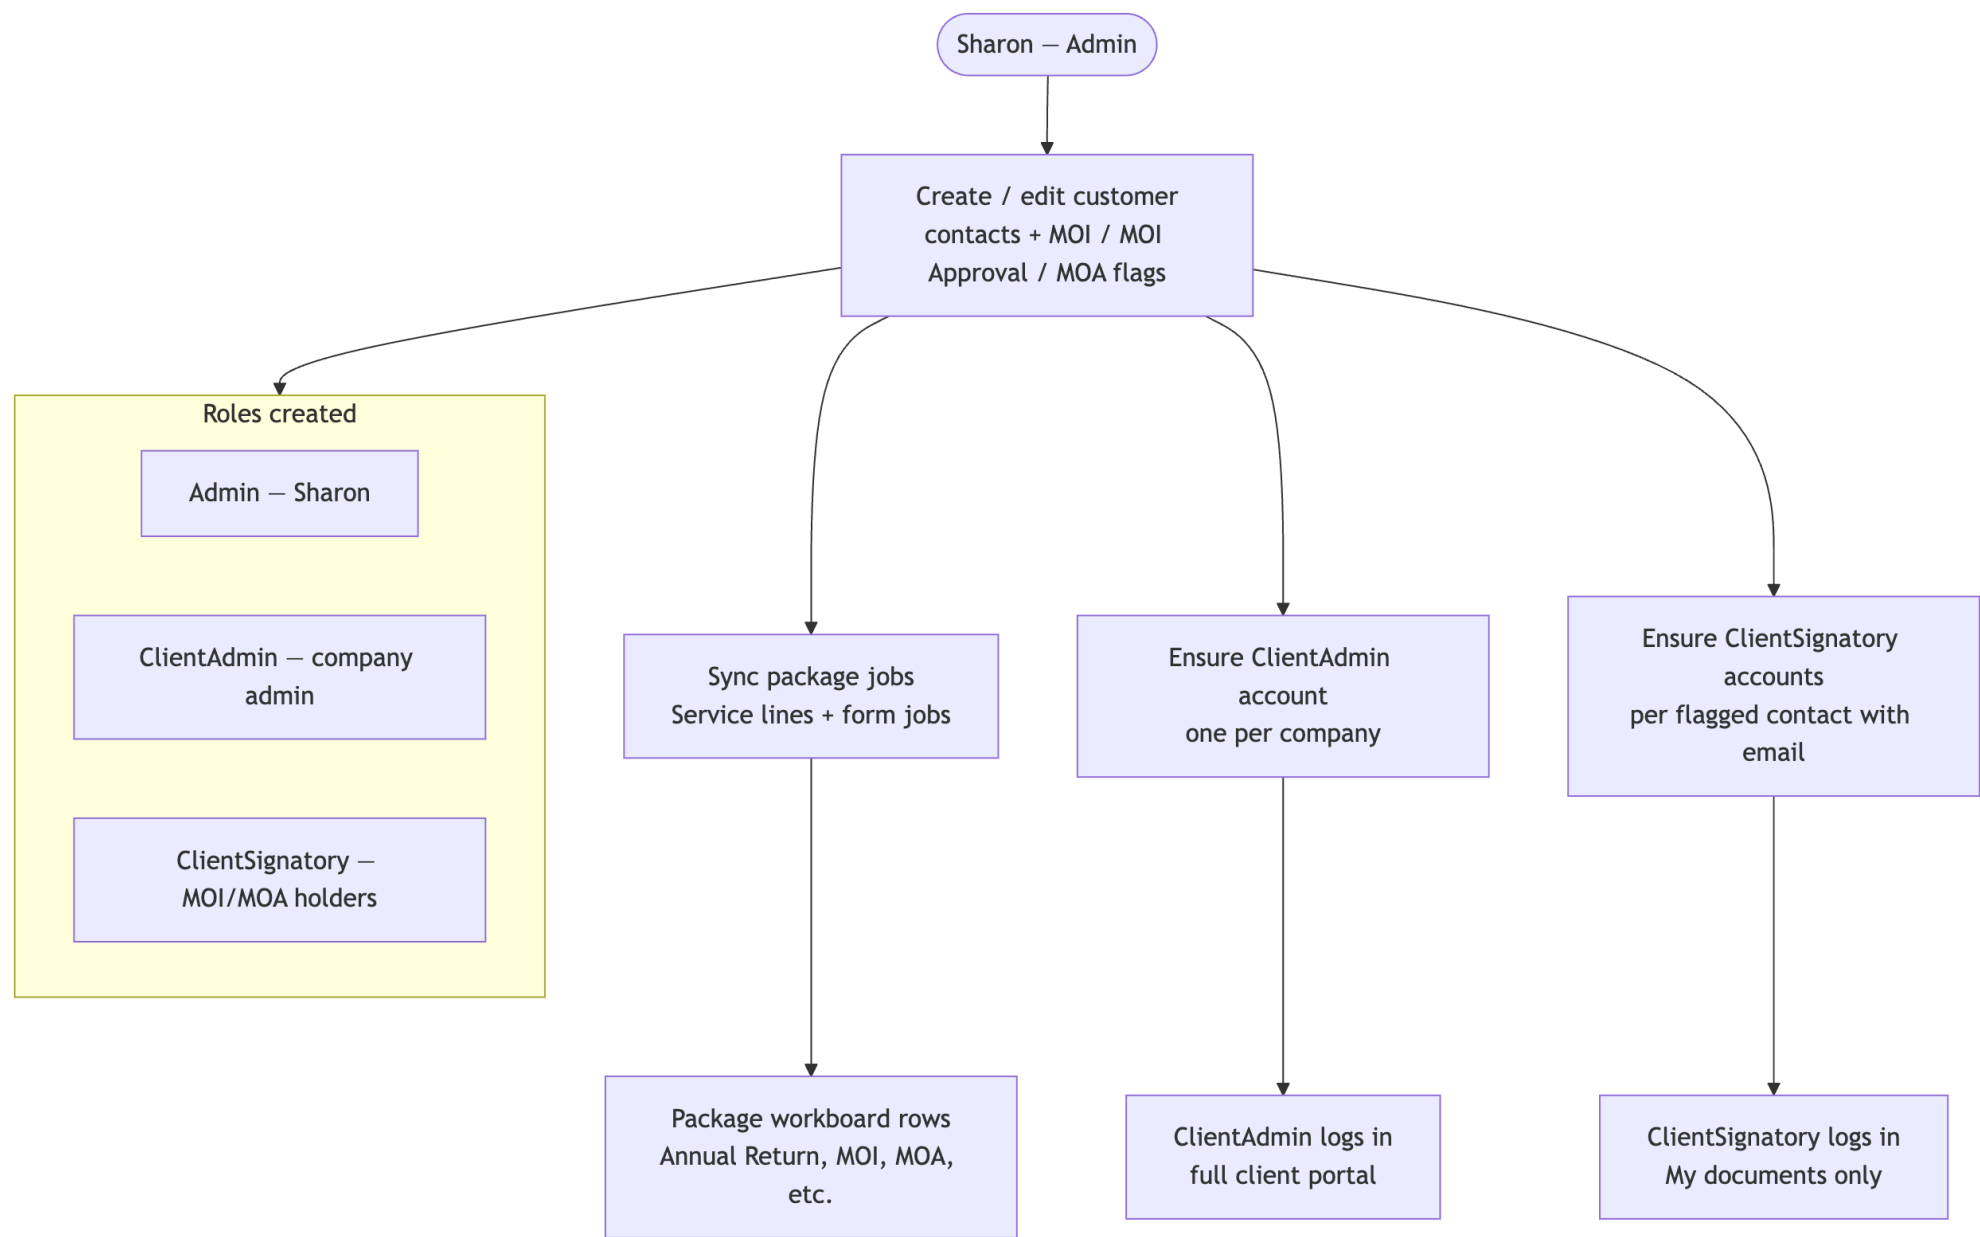

3. Internal permission overlays

Flag	Who typically	What it does
CanApproveMoiIntake	Sharon, named intake approvers	Approve client-submitted MOI → resolution can start
CanRecommendMoi	Division recommenders (matrix)	Recommend MOI after secretary prep
CanApproveMoi	Sharon	Final internal MOI sign-off
CanApproveMoa	Sharon	Oversight on MOA workflow (sees MOA before wide assignment)
IsInternalSignatory	CFO, Ms Teh, etc.	Named approver on internal MOA workflow steps

Configured in **Admin → Users** and **Admin → Workflow config** (link user to MOA template step).

4. Customer onboarding (who gets an account)

2. Customer onboarding & auto-provisioned accounts

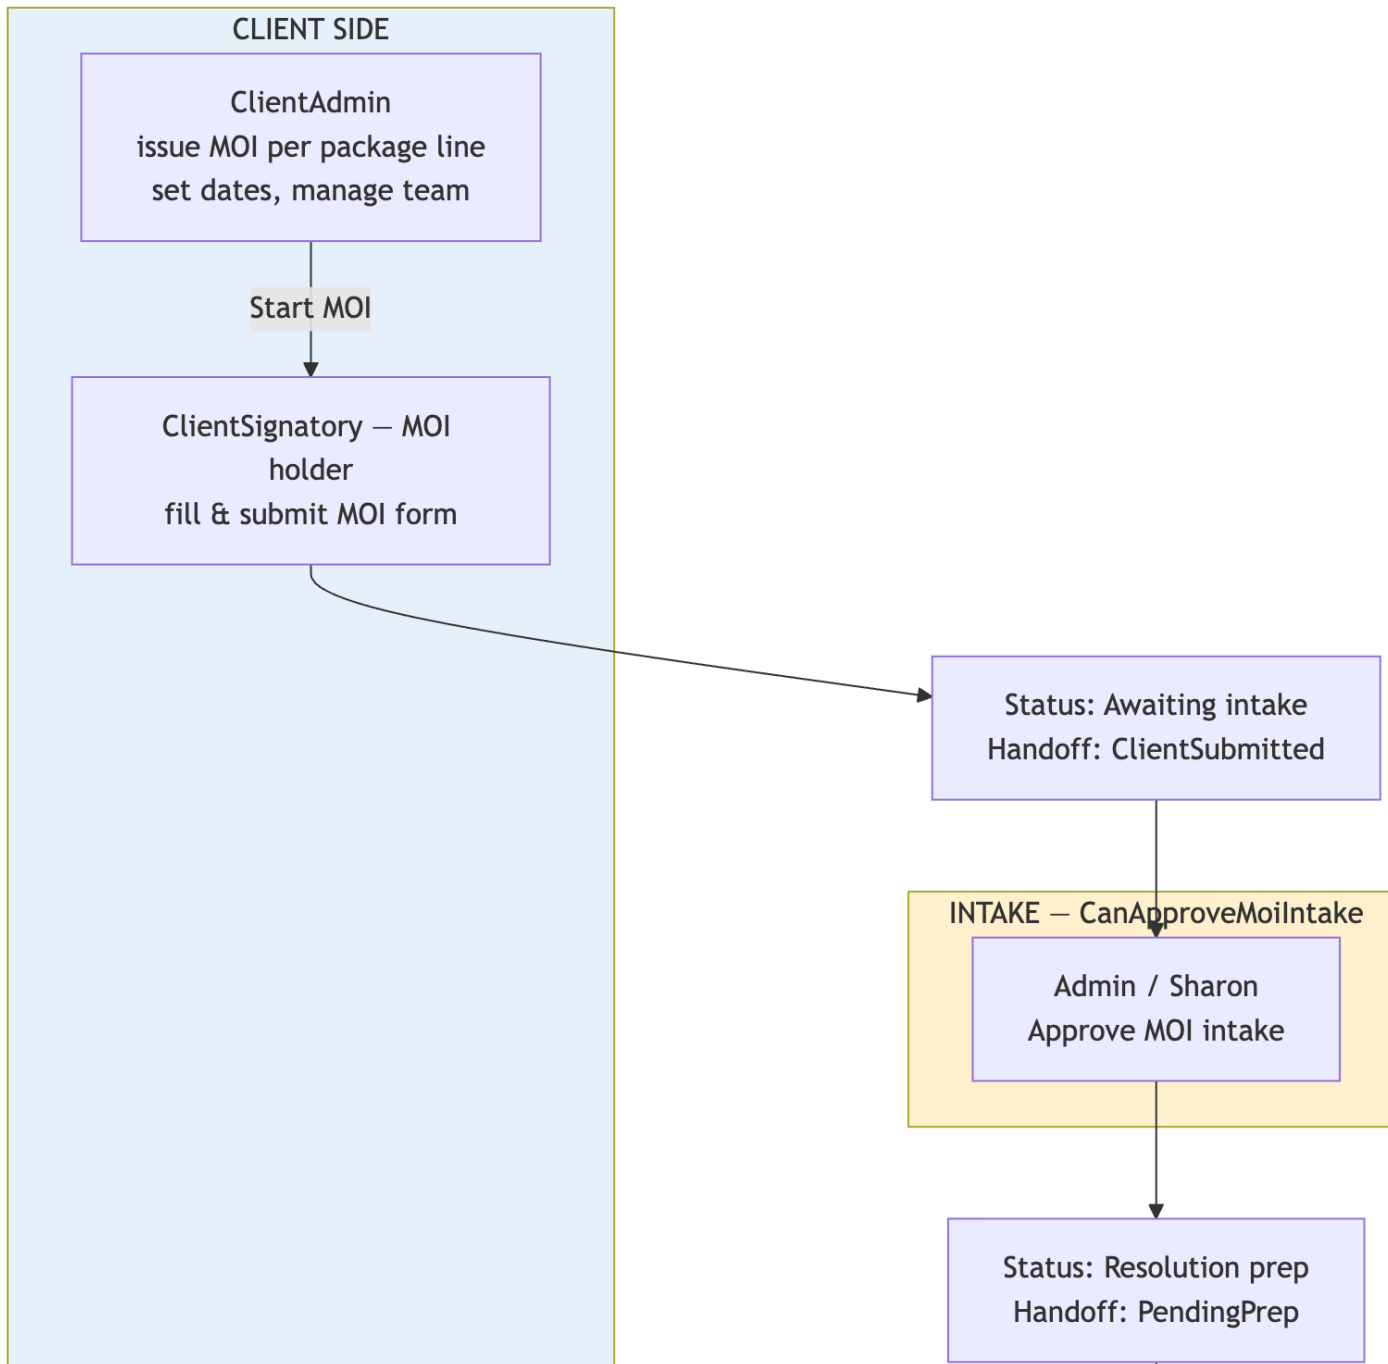

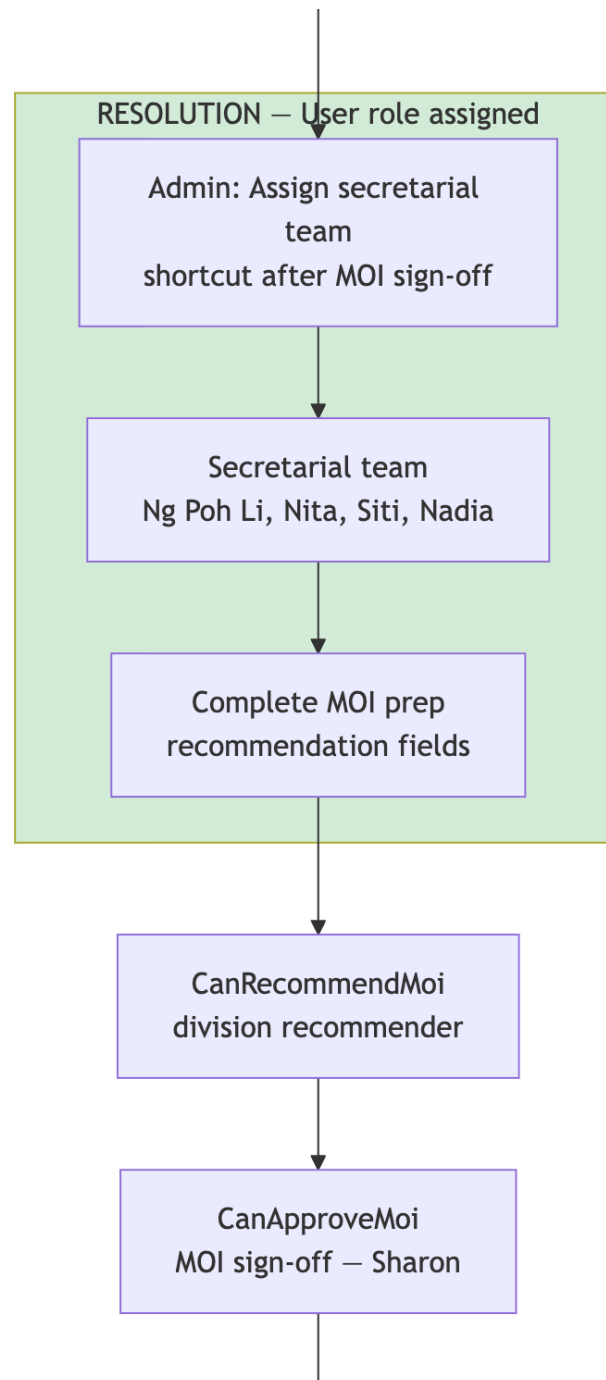

Trigger	Account created	Role
Customer saved	1× company admin	ClientAdmin
Contact flagged MOI / MOI Approval / MOA + email	1× per contact	ClientSignatory
ClientAdmin adds signatory (Team tab)	Holder + login	ClientSignatory (marked Client-added)
Admin creates user	Manual	Any of 4 roles

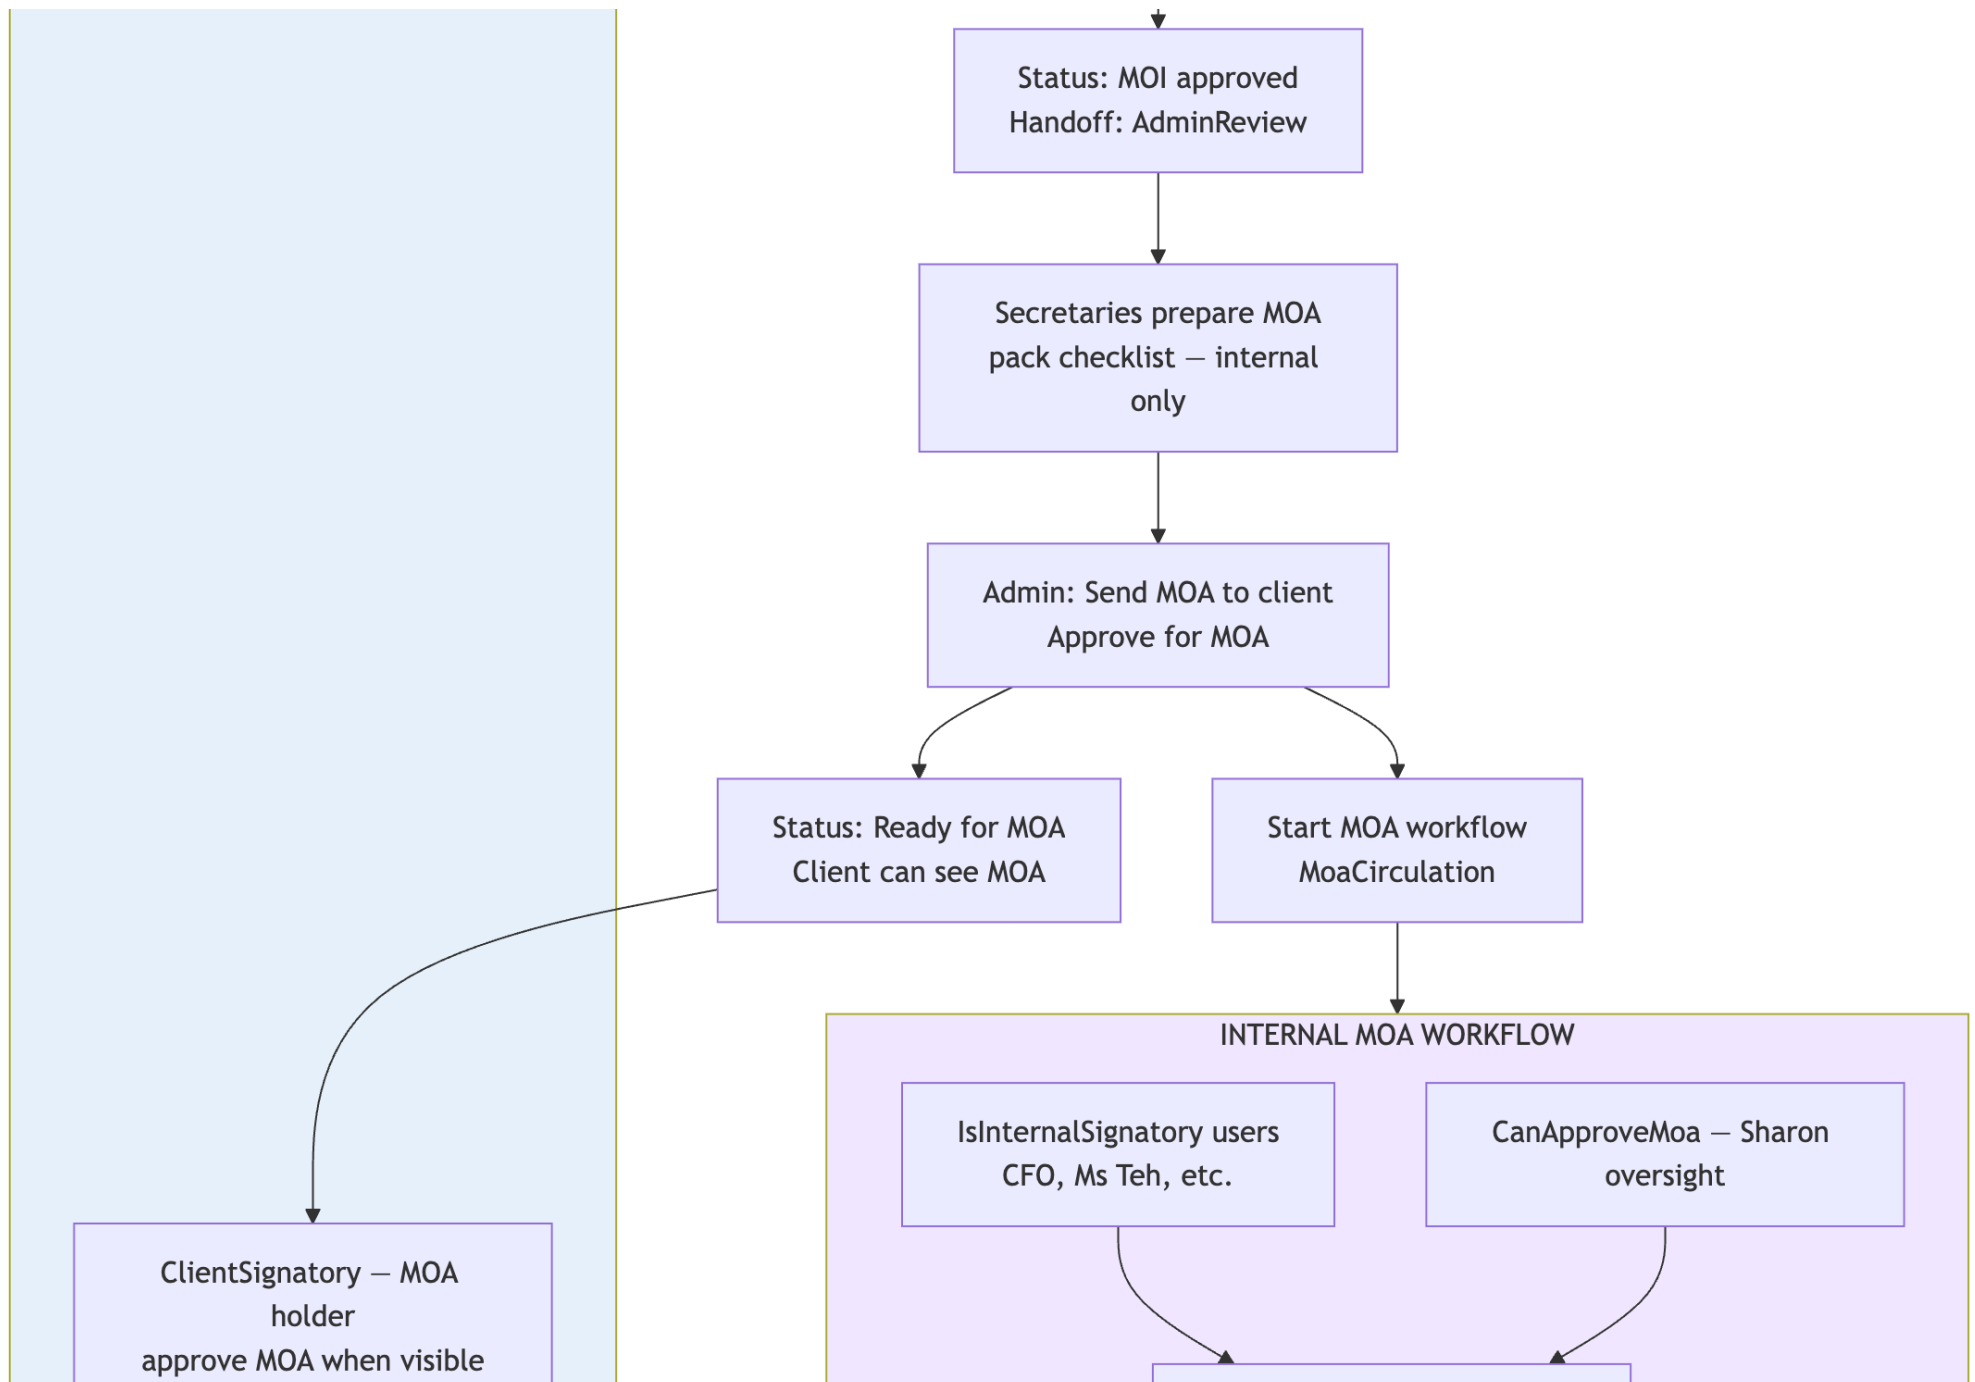

5. End-to-end MOI/MOA pipeline (roles at each step)

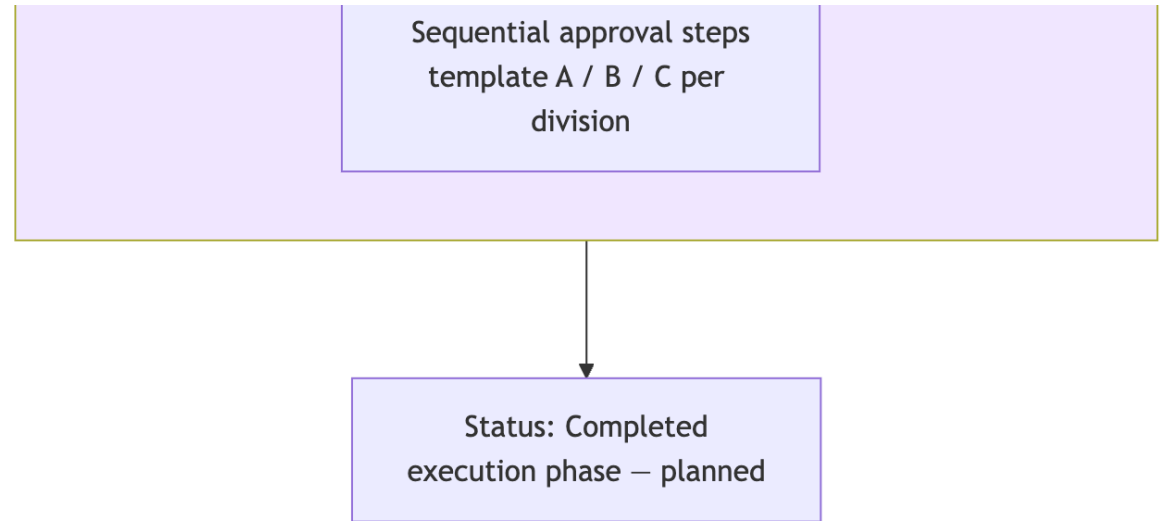

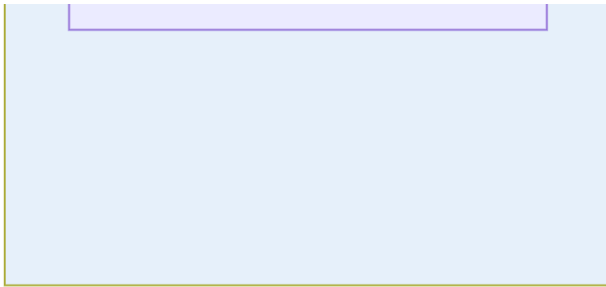

This is the **implemented** flow today. Steps marked *planned* are not built yet.

3. End-to-end MOI/MOA pipeline with roles

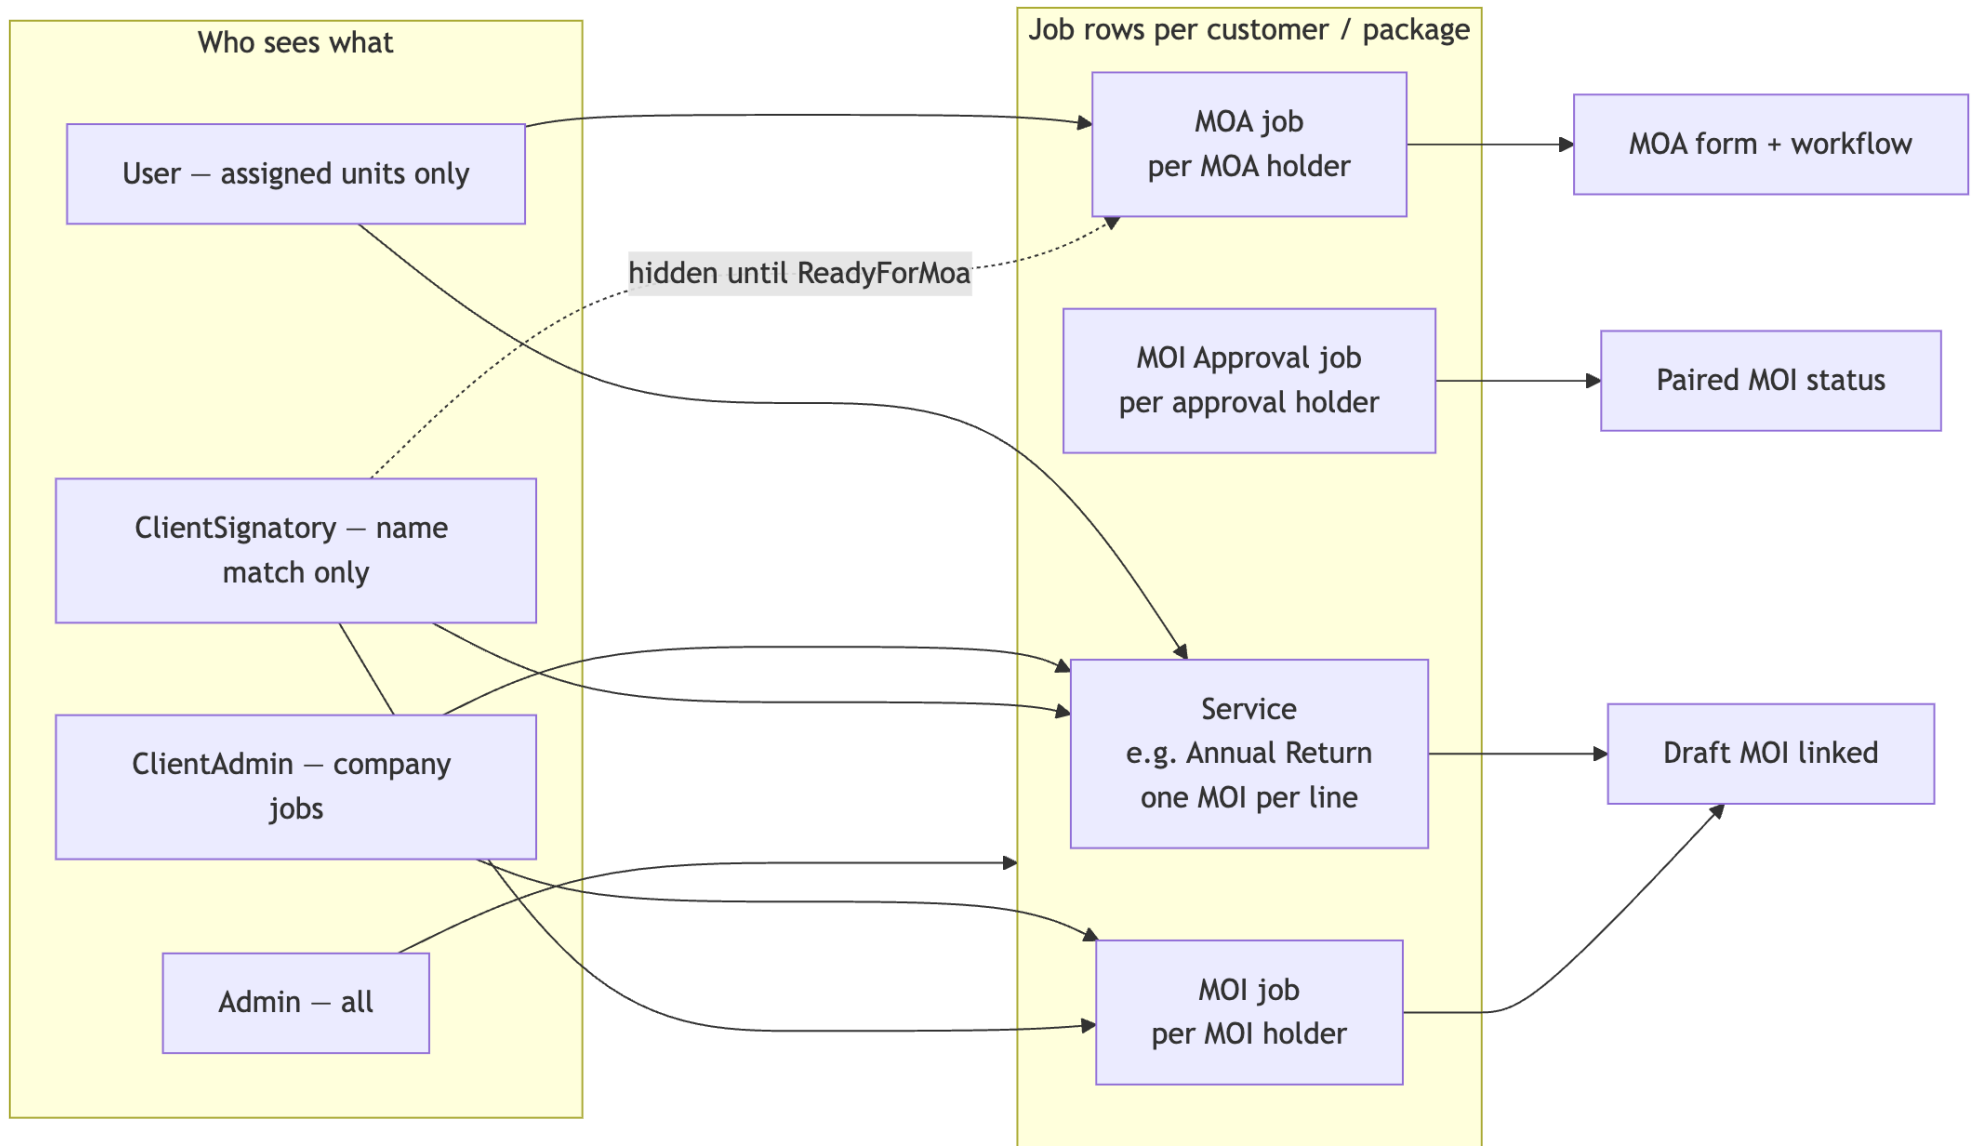

Step-by-step (role column)

Step	Display status (examples)	Handoff	Primary role(s)
Package synced	MOI not received	—	Admin (Sharon) creates customer
Client starts MOI	Awaiting intake	ClientSubmitted	ClientAdmin issues; ClientSignatory fills
Intake approved	Resolution prep	PendingPrep	CanApproveMoiIntake
Secretary works MOI	Resolution prep → Pending recommendation	ResoInProgress	User (assigned)
Recommended	MOI sign-off	—	CanRecommendMoi
MOI signed off	MOI approved	AdminReview	CanApproveMoi
MOA pack prep	MOI approved / internal	AdminReview	User via Assign secretarial team
Sent to client	Ready for MOA	ReadyForMoa	Admin — Approve for MOA
Client MOA	MOA circulation	MoaCirculation	ClientSignatory (MOA holder)
Internal MOA chain	MOA circulation	MoaCirculation	IsInternalSignatory + CanApproveMoa
Done	Completed	Completed	—

6. Job types & who sees them

4. Job types & visibility by role

Job TaskType	Purpose	ClientAdmin	ClientSignatory	User (secretary)
Service	Package deliverable (e.g. Annual Return)	Issue/open MOI	Start/open own MOI	If assigned
MOI	Form job per MOI holder	Company view	Own forms	If assigned
MOI Approval	Parallel approval track	Hidden on portal	<i>thin UX</i>	Internal board
MOA	MOA per MOA holder	After Ready for MOA	After Ready for MOA	Prep before client send

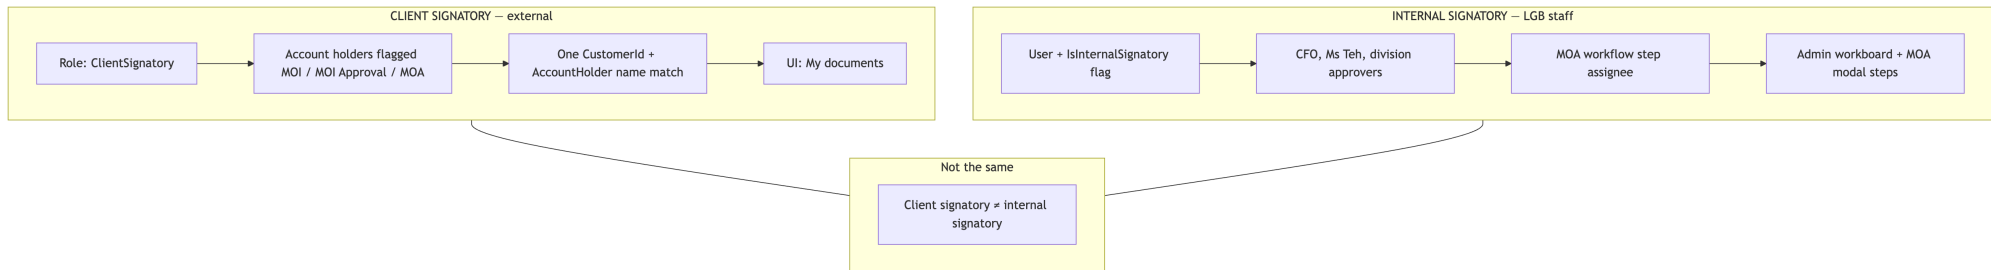

7. Display status lifecycle

5. Display status lifecycle

8. Client vs internal signatory

6. Client vs internal signatory

	Client signatory	Internal signatory
Role	ClientSignatory	User (+ optional flags)
Flag	—	IsInternalSignatory
MOI	Fill/submit as holder	Prep when assigned
MOA	Approve when sent to client	Approve workflow steps before/during circulation
Portal	My documents	Internal workboard

9. Seed / example accounts

Person	Role	Flags
Sharon	Admin	Intake, Recommend, MOI sign-off, MOA sign-off
Ng Poh Li, Nita, Siti, Nadia	User	— (assigned only)
{company} Admin	ClientAdmin	Auto per customer
MOI/MOA contacts	ClientSignatory	Auto from account holders
CFO, Ms Teh, ...	User	IsInternalSignatory + workflow step link

10. Summary

- **4 roles:** Admin, User, ClientAdmin, ClientSignatory
 - **2 sides:** LGB internal vs customer external (CustomerId boundary)
 - **5 internal overlays:** intake, recommend, MOI sign-off, MOA oversight, internal MOA signatory
 - **Client never sees MOA** until **Ready for MOA** (after Sharon approves for MOA)
 - **Secretarial shortcut:** after MOI sign-off, **Assign secretarial team** adds all resolution User accounts to the job + MOA row
-
